

BHUMIT VASAVA

Vadodara, Gujarat, India | +91 8780096080 | vasavabhumit4@gmail.com
linkedin.com/in/bhumit-vasava | github.com/BOOM-08 | bhumitvasava.vercel.app

EDUCATION

Neotech Technical Campus (Gujarat Technological University)

Bachelor of Engineering in Computer Engineering

Vadodara, India
Expected May 2029

Parul University

Diploma in Information Technology (CGPA: 7.16 / 10.0)

Vadodara, India
Jul 2023 - May 2026

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
Frameworks: Next.js 15, React 19, FastAPI, Node.js, Express.js
Cloud & Databases: Supabase (PostgreSQL), Firebase (Firestore, Auth), Vercel, MongoDB
AI & Machine Learning: Gemini 1.5 Pro API, Claude Sonnet 4.5 API, OpenAI Whisper, Wav2Lip, MCP
Developer Tools: Git, GitHub, Postman, CI/CD Pipelines, RESTful API Design

WORK EXPERIENCE

Freelance Full-Stack Developer

Independent Client Work & Prototypes

Apr 2026 - Present
Vadodara, India

- CORE GYM Platform:** Designed and developed an end-to-end fitness management web application as a proof-of-concept for a local client using HTML5, CSS3, and JS.
- Architected a responsive, high-performance UI and deployed a functional prototype via Vercel, demonstrating full booking and membership flow capabilities.
- Optimized frontend asset delivery and DOM manipulations to achieve sub-second page load times across mobile devices.

TECHNICAL PROJECTS

DubVibe Pro - AI Multi-Language Video Dubbing | [GitHub](#)

Feb 2026 - Jun 2026

Python, FastAPI, Gemini 1.5 Pro, Whisper STT, Wav2Lip

- Engineered an automated backend orchestrating LLM contextual translation (Gemini), speech-to-text (Whisper), and frame-accurate lip synchronization (Wav2Lip) supporting 10+ languages.
- Implemented an asynchronous task queue in FastAPI for concurrent pipeline processing, eliminating API thread-blocking under high concurrent video loads.
- Achieved a **90% reduction in dubbing turnaround costs** versus traditional agency services while maintaining near-native voice synchronization quality.

SkillBridge AI - Real-Time Interview Simulator

Jan 2026 - Apr 2026

Next.js 15, React 19, Supabase, Claude Sonnet 4.5, TypeScript

- Built a full-stack Next.js application integrating Claude Sonnet 4.5 to act as an adaptive AI interviewer, dynamically adjusting technical question difficulty based on live candidate responses.
- Architected a Supabase PostgreSQL backend with strict Row Level Security (RLS) to persist per-user session histories, skill scores, and specific improvement metrics.

Vocaberry - AI Vocabulary Memory Trainer | [GitHub](#)

Jan 2026 - Feb 2026

JavaScript, Firebase, AI APIs, HTML/CSS

- Developed a scalable spaced-repetition language learning platform utilizing React and Node.js.
- Integrated AI mnemonic generation APIs with Firebase Firestore for real-time data synchronization and persistent per-user recall tracking algorithms.

CERTIFICATIONS & ACHIEVEMENTS

- Model Context Protocol (MCP): Advanced Topics** (Anthropic, 2026): Mastered agentic LLM workflows and protocol-level AI integrations for scalable systems.
- Claude Code 101: Agentic AI Workflows** (Anthropic, 2026): Completed specialized technical training on cutting-edge Large Language Model tool utilization.
- Operating Systems Basics** (Cisco Networking Academy, Oct 2024): Demonstrated foundational knowledge in kernel architectures and OS management.
- Solutions Architecture Job Simulation** (Forage, Aug 2026): Completed practical tasks assessing client needs, designing scalable architectural solutions, and presenting technical recommendations.
